2018 MATH SUMMER CONFERENCES

4 great options to join us for the best professional development in the U.S.

Intimate. Idealistic. Inspiring.

 2018 MATH Summer Conferences	GREG TANG
Kansas City • July 10-12	
Seattle • July 23-24	
New England • July 30-31	
Baltimore • August 6-7	

For the 5th straight year, Greg Tang is hosting a selection of summer math conferences. Each will have three specially-designed learning tracks for K-2, 3-5 & 6-8 teachers. With 3 smaller, regional conferences to complement our national conference, we can offer personalized learning and more individual attention.

Do you have students who struggle with math facts or lack number sense? Do you have advanced learners who need to be challenged? And do you have students in the middle who are capable of so much more? If you are ready to take your teaching and students to the next level, then join us for MATH PLUS!

For 2018, Greg has assembled another world-class team of experts. Each of our speakers is a seasoned educator, skilled communicator, and highly sought after presenter with extensive experience presenting at major mathematics and education conferences. No hit-or-miss sessions here – they are simply the best of the best.

Last year's conferences brought together over 1000 educators for invigorating math PD. Teachers described their experience as "mind blowing, math altering", "invigorating as an educator & individual" and "by far the best conference I have ever attended."
